

Welcome to Day 5 of Maths Week 2019

Here are the **solutions** from yesterday's challenges:

Thursday Maths Challenge 2: I am the number 7, because SEVEN - 5 = EVEN

Thursday Maths Challenge 3: There are a total of 10,990 legs.

1. There are $7 \times 7 \times 7 = 343$ large cats. They have $343 \times 4 = 1372$ legs.
2. There are $7 \times 7 \times 7 \times 7 = 2401$ little cats. They have $2401 \times 4 = 9604$ legs.
3. There are 7 girls. They have 14 legs. **TOTAL: $1372 + 9604 + 14 = 10,990$ legs.**

Friday Maths Challenge 1:

Can you name all the months of the year? How many months are there? Can you put the months in the correct order?

Friday Maths Challenge 2:

Put the numbers from 1 to 9 in the circles, so that the sum of the numbers on each side of the triangles is the same.

Friday Maths Challenge 3:

A milkman has an 8 litre container full of milk. He also has two empty containers that measure 5 litres and 3 litres. He needs to deliver 4 litres of milk to a customer. The milk man has no other spare containers, and no way to mark any containers. He does not want to pour any milk away. How will he measure the 4 litres of milk?

Congratulations 😊

You have completed MAMJS Maths Week 2019 challenges!
